

Ambe Durga Education Society's  
**Dadasaheb Balpande College of Pharmacy (DBCOP)**  
Near Swami Samarth Mandir, Besa, Nagpur-37

**Program / Celebration Report**

**Name of the Program Conducted:** Essay writing Competition

**Topic:** Need to reform education system and make it adaptable to current scenario

**Date:** 11 /11/2022

**Venue:** Dadasaheb Balpande College of Pharmacy, Nagpur.

**Relevance to Pos:** 5,8,11

**Objectives:**

1. To know the students opinion about current education system and changes are required to make in the education system.
2. To improve the writing and communication skills of students

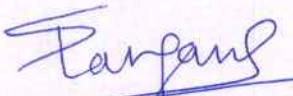

**Beneficiary:** Students

**Program organizing committee:** Dr.Purushottam Gangane, Ms. Vijaya Rabade

**Programme outcome:**

The essay writing competition starts the thinking process in the minds of students. Their views on the current education system and what reforms are required to upgrade the education system are come to know from this competition. Also writing and communication skills of students are explored and they get the right platform to express their views in right way.

Name → Khushi Omprakash Asati

Class → B.Pharm II<sup>nd</sup> Year.

'Education' it is the most precious and valuable skill. Every Human being have a right to have best education and being a good person. Education develop a person not only by mentally but also physically, socially and economically. It taught you to speak boldly confidently, makes your action and behaviour as an example for society.

Nowadays after a pandemic education's foundation is shaken and future of various people get scattered. Some of the population is not able to take the education from good universities, colleges and school because they are not economically enough to take the burden of expenses like fees, clearances and other various expenses.

Indian education system is one of the oldest education system. And after 1991 the ratio of illiteracy is very low. In case of women it is more than worse according to survey of that time only 36% women are literate. "When you literate a man you are teaching a individual, but when you literate a women you teach a family".

In current education system students have a lot of burden. After 5<sup>th</sup> standard syllabus introduces their mother language. Language is still a barrier in education system. Our education system is still working on marks or grade base system and deciding the future of students on the basis of marks.

Ability of every student is different. Mindset grasping capacity is different and it is need

In colleges students are spending their lot of time in classes where either teacher is just reading the ppt's or just telling the concept orally. All these methods are old and only useful for some students. Not every student is same sometime change the technique and the understanding of concept easy. Increase the use of technology, use some videos and 3d animation for understanding the concepts even betterly.

When the practical is done or any topic is over leave the students and give them time to spend in reading books and know the concept even betterly. Instead of make them sit forcefully till time finish is over. Curricullums are also very important they make the student confident and better

10+2 grade system is even worse. Admission in college should be given on the rankings only not by the "Reservations". Students in open category scored 90+ but didn't get a good college but student from Reservation categories like ST-SC-OBC etc. get the admission on 50+ or 60+ mark. Is that even fair? Capable students are thrown out of race just because of caste and category and this is the worst fault in education system. Private firm like (ICICA) (Chartered Account) these firm is private and there is no caste-category system is here and that's why they are producing the quality C.A. But in many other field caste-category donation and many other factors by which students ~~are~~ who are not even capable getting admissions.
