20	<p><b>Best Practices adopted, if any</b></p>
<p><b>BP – 1</b></p> <p><b>I)</b> Daily Advanced Training Activities (DATA) for content beyond syllabus &amp; Professional development</p> <p><b>II)</b> <b>Under lasting principles:</b> - Student admitted must be given inputs to make them industry ready professional employment, enterprise or further studies. University syllabus has limitation that it is not always tuned to recent developments. Also the students from rural background need a strong dose of soft skills &amp; professionalism so that they face the world &amp; make an informed decision.</p> <p><b>Goals of the practices :-</b> The designated goals are</p> <p>i) To enrich the content of syllabus with updates &amp; advances in the field.</p> <p>ii) To impart skill training on regular basis</p> <p>iii) To organize systematic inputs so that the student is able to make a choice for his own career</p> <p><b>III)</b> <b>Contact:</b> - The real challenge was to design the contents &amp; next challenge was to provide slots in an already studied time table. The allied challenge was to decide the pedagogy &amp; the reasons persons as the in house faculty are good at domain but professional development &amp; soft skills is not their forte.</p> <p><b>IV)</b> <b>The Practice:</b> - The design effort start much before the start of new semester. The gap identification effort is carried with the help of the industry experts &amp; senior faculty members. The gap identified is communicated to Bos in university &amp; involve faculty then decide on the contents to be incorporated as content beyond syllabus based on the call of experts. The internal &amp; external responses (if any) are then identified &amp; scheduled. The uniqueness lies in the spirit &amp; consistency of this practice. The general good it targets with students profile in mind. Daily half an hour ensures regularities in effort &amp; students are forced to look at their own profiles &amp; skills etc. Each semester students something extra in terms of soft skills &amp; professional development. Also the student diversity &amp; slow / advance learners need to be a kept in mind for execution constraint is maintaining tempo of efforts throughout the course &amp; limitation is to be cater to the interest of advanced learners. Balancing in this area is a big challenge</p>	

- V) Evidence of Success :** - As targeted the success is measurable in numbers year after year
- A) Employability improved as expressed in placement number
  - B) The number entering into entrepreneurship have also improved over the years
  - C) Most importantly the students clearing GPAT have also improved on intangibles the team spirit, belongingness, connect between faculty and student has improved. The students have also improved on their organizing skills. They have started winning prizes in academic and cultural events. The NSS activities have been more meaningful as a bi-product of this best practice.
- VI)** The effort like this gets late acceptability from the student community. The financial resources required are not much but the time from faculty (both planning execution) is to counted as a major resource. Identification of external resources and their remuneration is the only financial resource required. The study material required also consumer few resources. The review of the part years effort and improvement in current years content/ resource persons is a bigger challenge. All in all the physical and mental resonces put in are worth pulting in and students enjoy it in end.

## **BP- 2**

- I)** Course for course (CFC) engaging DAP for reducing Carbon Footprint
- II)** Society at large must play attention & provide equal opportunity to differently abled persons. Securing employment in a very difficult task for a mentally challenged persons. Environmental consciousness is a big issue in Indian society. Simple steps to reduce unnecessary energy consumption must be taken by proper monitoring of resource spending like numbers of priritonts, watering to plant, switching off the fans & lights etc.

### **Goals of Practice :** -

- i) Make best of the humans reasons in the form of differently able person by providing him/her a dignified way to earn livelihood.
  - ii) To sensitise young generation on usefulness of DAPS and create an acceptability for such persons
  - (iii) Purposeful reduction in wastages of all kinds to promote ecofriendly systems by prompt and regular monitoring
  - (iv) Make the institute paperless in 10 yrs time by reducing paper usage by 10% every year
- III)** The real challenge was to involve and include a DAP in the task which requires focus and attention at all times. Identification of such person(s) was another issue. The next challenge was to identify the tasks so as to reduce wastage that are harmful to environment. Wastages that damage environment are everywhere prioritising from then and targets them in a systematic manner is a different challenge
- IV)** Inclusive growth, positive approach and treatment towards DAPS are good concepts but identifying a resources and testing it is a very different tasks. Sequencins of tasks and ensuring that the DAP is a actually able to do it was the biggest difficulty. A format was prepared to note down and records the work done and finally it was important to check that the effort is fruitful. The uniqueness of this effort is that IT targets many things in one stone. It taken care about divyangs, sensititises youth, records wastages and reducer carbon foot print. The DAP is expected to monitor and enter informat action to reduce wastages in the format provided. He/ she is expected to visit all floors, classroom, tabs, garden library office and solar powered light too.
- V)** Since the goals were different, the success could be measured both tangibly intangibly. One can look at reduced wastages evident in monitory electricity bills, consumption of water, consumption of printer paper etc. providing employment opportunity to DAPS was one of the goals and the college was successful in identifying one such special person. Creating positivity towards DAPS by sensitizing youth was on of the objectives the impact can be seen through the feedback of alumni after they leave college and live in larger society 10% reduction in paper usage is also being achieved year after year and the college administration is on its way to become paperless.
- VI)** The main problem was the identification of suitable person for the jobs. Next was to ensure acceptability of DAP in the systems. Enthrusting the tasks of monitory and supervision on a DAP do raise few eyebrows and it takes time to create faith and acceptability among others staff. Last but not least was to test the DAP on the job. The resources required were supported by management. The monthly salary of DAP, Design of forms & formats are sponsored by management.
